Hiring Team

Acorns

Dear Hiring Team,

I am writing to express my interest in the Software Engineering Intern position for Summer 2025 at Acorns. As a Computer Science undergraduate specializing in AI at Newton School of Technology, I have been actively involved in backend and full-stack engineering, with hands-on experience in building scalable systems using Node.js, Express, and React Native.

Currently, I am interning as a full-stack developer in a fast-paced environment where I've worked on production-grade features, integrated APIs, and collaborated across teams to deliver real-world impact. I'm also building *Astravision* —an AI and blockchain-powered platform offering CRM, ERP, and HRMS tools for modern enterprises. This initiative has taught me the importance of user-first design, scalable backend systems, and continuous iteration, which strongly aligns with Acorns' mission to deliver financial wellness through innovation.

I am particularly inspired by Acorns' commitment to empowering up-and-coming users through micro-investing and responsible financial tools. Your emphasis on trust, bold decision-making, and continuous growth resonates deeply with my own principles as a builder and learner.

I would be thrilled to contribute to your engineering team, learn from your exceptional mentorship, and bring my skills and startup mindset to your projects. Thank you for considering my application—I look forward to the opportunity to contribute and grow with Acorns.

Warm regards,

Abhishek Meena
