Hiring Team
Acorns

Dear Hiring Team,

I'm writing to express my strong interest in the Summer 2025 Software Engineering Intern position at Acorns. While I understand the role is primarily intended for students graduating in 2026, I hope you'll consider my application despite my 2027 graduation timeline. I believe my experience, drive, and engineering maturity already align closely with the responsibilities and expectations of this role.

As a Computer Science undergraduate at Newton School of Technology, I've spent the past year deeply involved in backend and full-stack development. I'm currently interning as a full-stack engineer where I've contributed to production-level features, API integration, and real-time issue resolution. I'm also leading the development of *Astravision*—a platform that integrates AI and blockchain to deliver CRM, ERP, and HRMS tools. This project has taught me how to design scalable systems, iterate fast, and prioritize user impact—skills that mirror the product philosophy at Acorns.

What draws me to Acorns isn't just the engineering opportunity, but your mission to democratize financial wellness. Your focus on trust, bold innovation, and continuous growth resonates strongly with my own values as a builder and learner. I see Acorns as the perfect environment to stretch my abilities while contributing to something meaningful.

I'd love the opportunity to grow under your mentorship and bring my skills, energy, and startup mindset to your engineering team. Thank you for considering my application—I truly hope to contribute and grow with Acorns.

Warm regards,
Abhishek Meena
